

AMERICAN MADE, BUILDER GRADE

Now your home has a powerful ally against air infiltration and weather — Barricade® Wrap. Join the numerous builders already using Barricade, and stop air infiltration and weather in its tracks.

WHY YOU NEED IT

Higher performance

Micro-perforations designed for maximum performance. We don't just punch holes in the material – our perforations have been designed with the angle, size, and direction that offer maximum performance.

Breathable membrane

If moisture gets trapped in the walls, it can destroy the integrity of your insulation. Our unique, micro-porous, breathable membrane allows moisture vapor to pass through without becoming trapped in the wall cavity to provide the utmost in air and moisture control.

Superior strength

Barricade Wrap is made of a cross-woven polyolefin material known for its superior strength and tear-stop design.

Designed translucence

Barricade Wrap is designed to be translucent, making studs and framing members easy to find.

Recognized as an air barrier

Compliant with IRC and IBC as an air barrier.

Resists bulk water

Resists water penetration from wind-driven rain and other sources.

Superior wind and tear resistance

Heavy winds pose a threat to house wrap during installation. With its tear-stop design, Barricade Wrap is one of the most durable wraps around.

Stops solar vapor drive

Limits incoming moisture while allowing unwanted moisture to escape the wall cavity. This prevents the moisture from inward solar vapor drive from damaging the wall cavity.

UV resistance

Barricade's special ultraviolet stabilizers protect it from the sun's harsh rays. In fact, Barricade Wrap is protected against UV rays for up to 12 months.

GET THE BEAR MAXIMUM, NOT THE BARE MINIMUM

While we consider this our builder-grade wrap, Barricade Wrap has been designed and manufactured to a higher standard than many builder-grade wraps. Our reduced overhead can lower your costs while providing you with a product of equal or greater quality. See how Barricade® Wrap measures up:

Better protection, better reliability

With Barricade Wrap, we've eliminated the associated risks and quality issues you would normally face with imported solutions.

Barricade allows moisture to escape.

If moisture gets trapped in the walls, it can destroy the integrity of your insulation. Barricade's unique design allows it to breathe, permitting moisture to pass through its surface.

Warranty

Backed by a 10-year limited system warranty.

Better cost efficiency

We offer name-brand quality with lower overhead, reducing your costs while providing you with the same high-quality product.

Barricade private label

Advertising your business takes time, energy, and most of all money. Barricade Wrap offers a private label program that is a cost-effective way to advertise your business on every home you build.

Barricade® can help reduce air infiltration when you seal and insulate!
