

L.J. Smith introduces a new Concealed Iron Baluster Fastener for use in all applications: open tread stairs, kneewall stairs and level runs. This new fastener design provides a clean, finished look without the need for adhesives or shoes. Simply install the lag of the assembled fastener into the wood tread, kneewall plate or landing tread and slide the bottom of the trimmed baluster over the fastener until the baluster is tight against the wood mounting surface. Made for any of our 1/2" hollow square iron balusters and comes with instructions.

LIH-HOL1/2CONCEAL

For use with 1/2" square hollow balusters
