A·D·O®

PRODUCTS YOU NEED. SERVICE WE DELIVER.

OUR COMPANY CULTURE

SAFETY

is our number one priority. Care for the well-being of employees, facilities and equipment is essential to responsibly operating a manufacturing and distribution company.

WE WILL FOCUS

on our customers and suppliers to ensure we deliver an outstanding partnership experience every time.

WE WORK

with a **Positive Attitude**, celebrate accomplishments and learn from our mistakes. We remain flexible to changing business conditions.

WE BELIEVE

as a team we are stronger than as individuals. **Teamwork** multiplies our efforts. Open and honest **Communication** between departments and each other is a must for us to win as a team.

PROFESSIONALISM

is the cornerstone in all business relationships. We act with **Integrity** when dealing with each other, our customers and our suppliers. We are **Accountable** for delivering on our commitments and treat everyone with mutual **Respect**.

WE EXPECT

all employees to be **Innovative**, **Inspirational** and **Lead by Example**. Everyone is accountable for their own personal development. We invest in individual training, which drives personal and professional growth.

To Place an Order

You may conveniently order by phone, fax or email.
Most orders received before 2 pm CST will be shipped the same day.

By Phone: Call 1-800-666-8191

Monday-Friday 7:00 am - 5:00 pm CST

By Fax:

Send fax to 1-888-641-3904

By Email:

Send your order to sales@adoproducts.com

ADO Return Policy

ADO will accept returns based on the following conditions:

If the return is a result of an error made by ADO, a carrier, or vendor of ADO, we will gladly replace the item and credit all shipping charges and restock fees. All products that are to be returned MUST have a Return Authorization (RMA) number assigned. To receive an RMA number, please call your ADO Account Manager at 800-666-8191.

All returns must be securely packed in the original packaging, received in resalable condition, and returned within 60 days of original shipment. Returns are subject to a 15% restock fee and return freight charges. No returns will be accepted on Special Order or Clearance items.

HOW A STATIC ATTIC VENTILATION SYSTEM WORKS

Rafter vents along with soffit and exhaust vents are the components of a Static Attic Ventilation System. Air is introduced into the system through the soffit vents, channeled along the roof deck through a rafter vent and then is expelled through an exhaust vent.
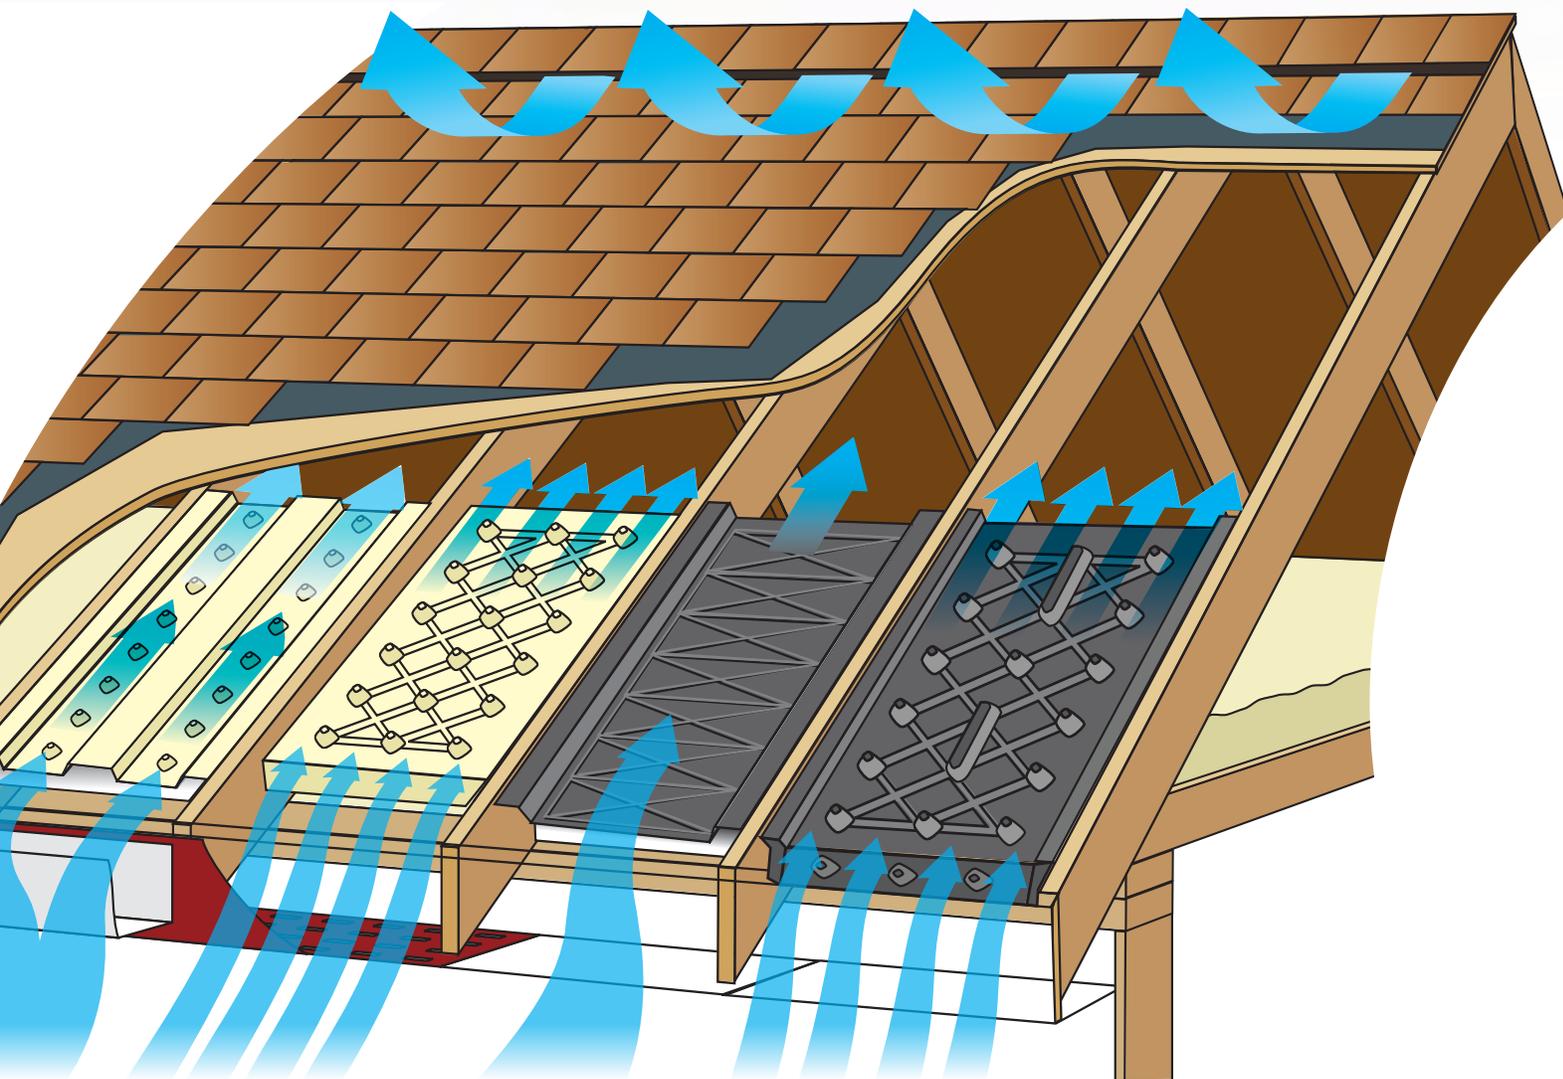

THE BENEFITS ARE MANY.

• Allows for drier attics   • Helps prevent ice-dam formation

• Helps prolong shingle life   • Improves insulation efficiencies   • Allows for cooler attics in summer months

DUROVENT®

(A) DUROVENT®

The **Number ONE** selling vent in the industry! The polystyrene material provides a lightweight water resistant air channel. Ideal for high volume new construction or lower cost re-insulation.

• Economical way to meet energy code requirements for air flow

• Multiple lengths and perforated center line to fit all applications

• Wide nailing flange and center strut allows for easy installation

KEY	SKU	DESCRIPTION	PACKAGING	MIN QTY
A	DV2200	Durovent—22" x 48"	50/bag, 1000/pallet	1000

†10-day lead time.   *NOTE: Product color may differ by shipping location.*
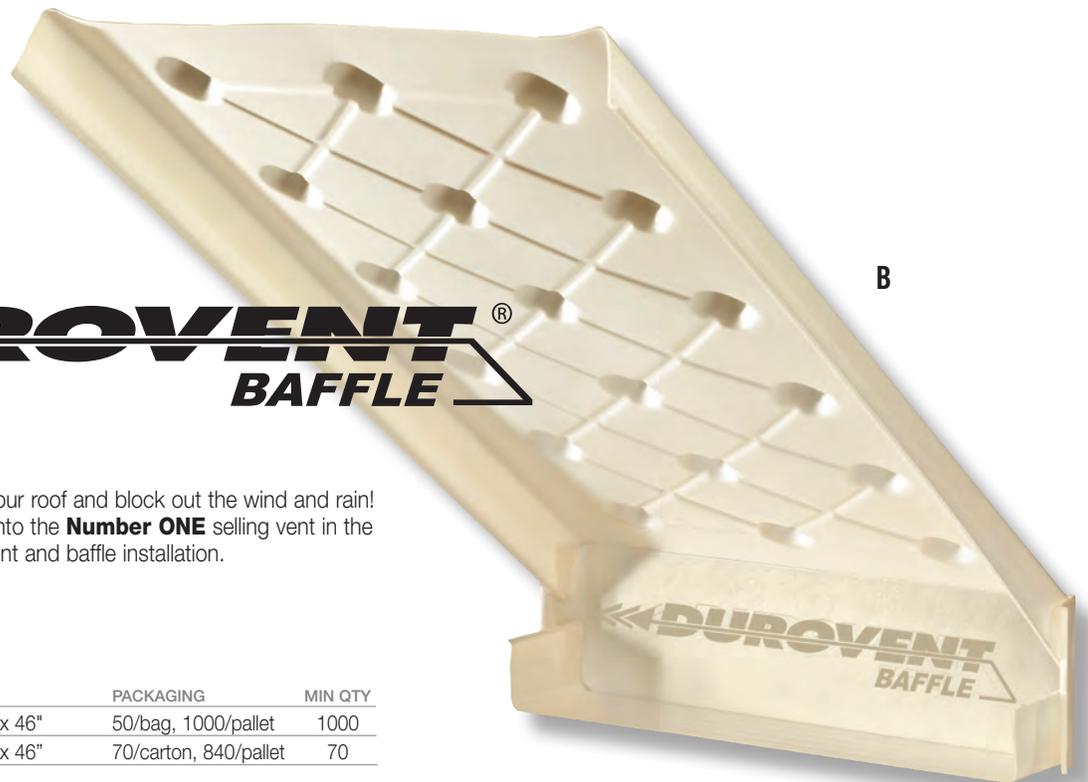

DUROVENT® BAFFLE

(B) DUROVENT BAFFLE®

The most economical way to ventilate your roof and block out the wind and rain! A water resistant baffle is incorporated into the **Number ONE** selling vent in the industry allowing for a one-step rafter vent and baffle installation.

• One-step installation

• Easy positioning and stapling

• Allows for wide range of heel heights

KEY	SKU	DESCRIPTION	PACKAGING	MIN QTY

proVent®

C

(C-D) proVent®

Ideal for premium construction and for difficult applications like re-insulation. proVent may be installed prior to the soffit panel installation without fear of blow-out.

• Made with Pro Grade tear-resistant High Impact Polystyrene

• Rigid vent construction eliminates breakage during re-insulation

• Full joist coverage for maximum air flow

proVent® BAFFLE

E

The Versatile Baffle for the Insulation Professional.

• Withstands heat and pressure of spray foam

• Versatile design adapts to varying heel heights

• Attaches to the truss, as well as the roof deck

• Will not absorb moisture or grow mold

• Made from High Impact Polystyrene

• Spans the entire width of the bay – 16" or 24" O.C.

A

PATENT PENDING

WINDBLOC
RAFTER AIR INFILTRATION BLOCK®
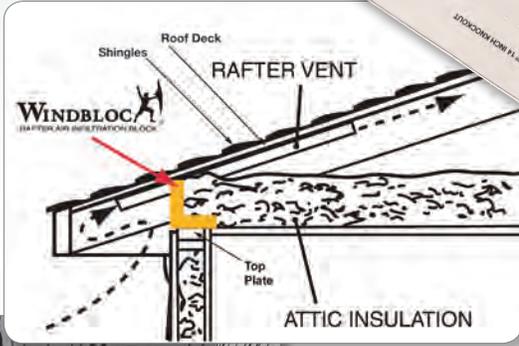

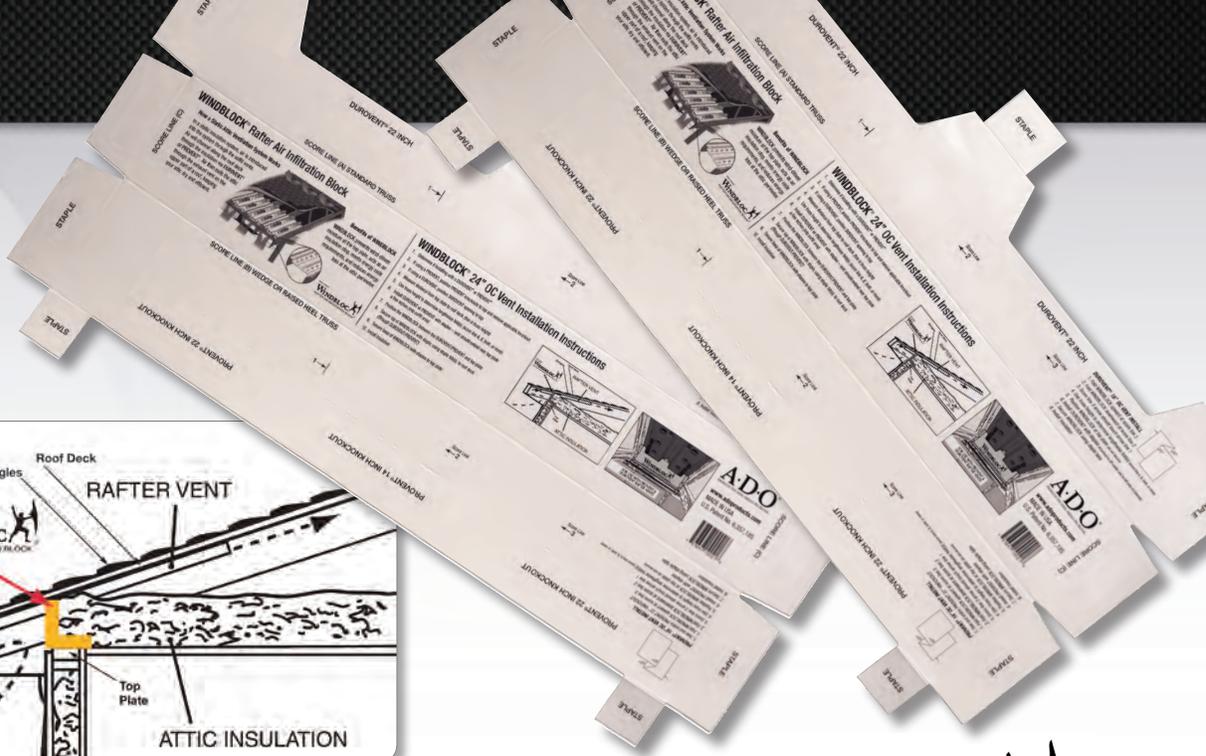

(A) Windblock®

Provides the best moisture and air infiltration seal between the rafter vent and wall top plate. Works with Durovent and proVent to provide a moisture impervious vent and block system.

- **Now scored for 16" and 24" O.C.**
- Install with rafter vents to maximize attic ventilation performance
- Secures vent in place thus eliminating blow-out during construction
- Blocks moisture from exterior and acts as an insulation stop
- Meets energy code requirements for air infiltration
- Provides a moisture and air infiltration seal between the rafter vent and top of the wall
- Prevents wind driven moisture and cold air infiltration between the rafter vent and the top of the wall
- Reduces energy loss at the attic perimeter
- Effective for use in new and retrofit applications
- Constructed of waterproof and durable polyboard

B

Unique rise height!
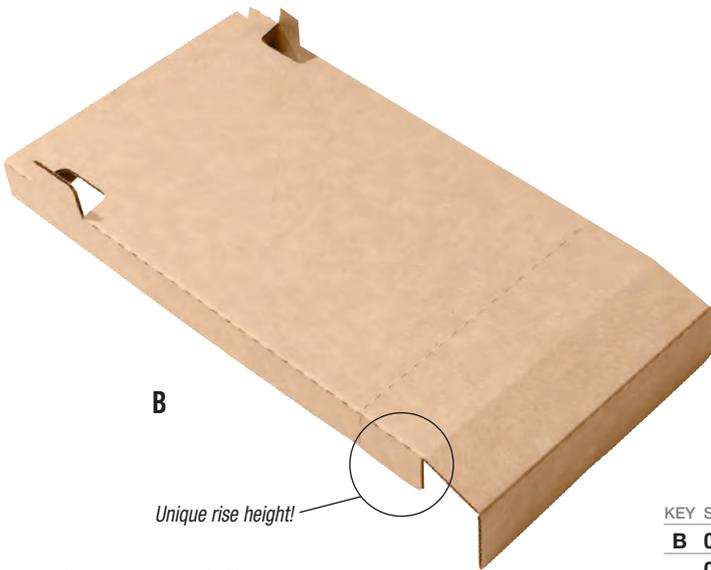

(B) Cardboard Baffles

Cardboard provides an economical vent that is easily installed. The baffle is incorporated into the vent providing a wind barrier to the exterior and an interior block for blowing in attic insulation.

- Flexible material for installing on all joist sizes
- Vent incorporates a 6-9" tail that provides a full cavity block
- Stores flat and is easy to transport and handle

FAST FOAM™

E

Fast Foam™

Fast Foam™ low pressure one-component polyurethane foam sealants (OCF) are moisture cured and designed to completely fill and seal small gaps, cracks and voids. These polyurethane foam sealants have excellent adhesion and expansion characteristics ensuring a complete and permanent air tight seal. Compatible with Handi-Tool applicator guns.

(A-B) Fast Foam™ Window & Door

Low pressure one-component polyurethane foam sealant (OCF) is a closed cell, AAMA compliant, low pressure window and door foam that will not bow or distort windows or doors.

KEY	SKU	DESCRIPTION	CANS/CASE	CASES/PALLET
A	FFWDG	Window & Door Gun — 24 oz can	12	48
B	FFWDS	Window & Door Straw Top —12 oz can	12	75

(C-D) Fast Foam™ Fireblock

Low pressure one-component orange polyurethane foam sealant (OCF) is a closed cell, low pressure polyurethane foam designed to seal, fill, bond and stop air infiltration. More effective than traditional fireblock materials at blocking the passage of flame and smoke from room to room and floor to floor in residential construction.

KEY	SKU	DESCRIPTION	CANS/CASE	CASES/PALLET
C	FFFBG	Fireblock Gun — 24 oz can	12	48
D	FFFBS	Fireblock Straw Top —12 oz can	2	75

(E) Fast Foam™ Extreme

Fast Foam™ Extreme low pressure one-component polyurethane foam sealant (OCF) is formulated specifically for use in extreme temperatures and cures in temperatures as low as 0° F (-18° C). This product is a closed cell polyurethane foam, intended for use in small gaps, cracks and voids.

KEY	SKU	DESCRIPTION	CANS/CASE	CASES/PALLET
E	FFEXG	Extreme Gun — 24 oz can	12	48

(F-G) DC315

DC315 is an intumescent coating for Spray Polyurethane Foam (SPF) and provides an alternative 15 or 20 minute thermal barrier. Tested and compliant in the USA by ICC-ES, and Canada by CCMC. DC315 is the most tested and approved alternative thermal barrier on the market today!

HANDI FOAM

SEALANT

(A) Handi-Foam® Extreme Polyurethane Foam

Formulated to work in extreme climates where ambient moisture/humidity is not always present. Tack free within 10 minutes and meet ASTM E-84 Class 1 for caulk and sealants. Handi-Foam® Extreme is the perfect choice for sealing needs in extreme climates.

KEY	SKU	DESCRIPTION	CANS/CASE	CASES/PALLET
A	P30120	Handi-Foam Extreme Gun Foam—24 oz can	12	48

(B) Handi-Foam® Fireblock Polyurethane Foam

Designed to seal, fill, bond and stop air infiltration. Handi-Foam is more effective than traditional fireblock materials at blocking flames and smoke. Recognizable orange color allowing inspectors to easily identify the use of an approved fireblock product. Passes ICC-ES evaluation for use as a fireblock.

KEY	SKU	DESCRIPTION	CANS/CASE	CASES/PALLET
B	P30181	Handi-Foam Fireblock—24 oz can	12	48

(C) Handi-Foam® Window and Door Polyurethane Foam

Multiple purpose, UL classified, one-component polyurethane foam designed specifically for window and door installation and retro-fit applications. Low pressure formulation will not bow windows or door frames. Expansion is dependent on ambient conditions. Provides a higher R-value than open cell polyurethane window and door foam sealants. Meets AAMA (American Architectural Manufactures Association) test specifications for low pressure window and door sealant foams.

KEY	SKU	DESCRIPTION	CANS/CASE	CASES/PALLET
C	P30272	Handi-Foam Window & Door Foam —24 oz can	12	48

(D) Handi-Foam® Polyurethane Straw Foam

May be used to seal, fill, bond, and stop air infiltration. Designed to seal and fill small cracks, gaps, and voids.

KEY	SKU	DESCRIPTION	CANS/CASE	CASES/PALLET
D	P30107	Handi-Foam Straw Foam Sealant —24 oz can	12	48

(E) Handi-Foam® Black Sealant

One-component polyurethane foam (OCF) sealant specifically designed black in color, making it ideal for applications where product appearance may be a factor. Handi-Foam Black Sealant utilizes a (HC) propellant. May be used to fill gaps and cracks in pond and waterfall design, landscaping, RV undercarriages, crack and hole repair in trees, as well as to seal gaps and penetrations in the building envelope. Fish and plant safe.

KEY	SKU	DESCRIPTION	CANS/CASE	CASES/PALLET

(A) Handi-Foam® Channel Fill

High Flow technology is an industry first low pressure polyurethane foam category that takes traditional pour-in-place polyurethane foam and adds the ability to completely fill difficult and intricate voids, making impossible applications possible. Handi-Flow Channel Fill is a stable, chemically cured foam that will not settle, shrink or post expand over time—providing quality assurance that the cavity is and will remain completely filled.

(D) Tank Foam Sealant

Multiple purpose, UL classified single component polyurethane foam designed for the professional user. Dispensed through a flexible hose with a valve controlled dispensing nozzle. Optimal application temperature is between 65-100° F (18-38° C), and may be used between 40–115° F (5–46° C). Dries tack-free within 10 minutes or less depending on moisture and temperature conditions. Cuttable within one hour and fully cures in 12–24 hours. Flame spread 25 and smoke developed 50. UL classified file #R13919 Caulking and Sealants. ASTM E-84 (12.5%).

(B-C) E-84 Class 1

Handi-Foam® E84 Class 1 Spray Foam is a low pressure foam system that utilizes a non-flammable blowing agent. Handi-Foam E84 Class 1 Spray Foam has been specifically formulated for flame retardancy and conforms to the requirements of ASTM E84 as a "Class 1(A)" system (flame spread of 25 or less, smoke development of 450 or less). The foam helps to lower heating and cooling costs by drastically reducing energy consumption.

HANDI FOAM
SEALANT

Handi-Foam Spray Polyurethane Foam (SPF)

Handi-Foam's refillable foam systems are chemically cured, two-component spray and pour-in-place polyurethane foam systems, packaged in low pressure refillable cylinders. These systems are designed for larger applications, assembly line filling or any unique application that requires a balance between quality and affordability. Refillable foam systems are available in a variety of sizes and formulations to meet application and market requirements.

The refillable foam systems dispensing equipment utilize the same patented Handi-Gun® as our disposable foam kits, providing accurate and precise dispensing. The addition of the Magnum Heated System® provides improved temperature control and extended reach for increased flexibility.

(A) E-84 Class 1 Refill Systems

Handi-Foam® E84 Class 1 Spray Foam Refill Systems are low pressure foam systems that utilize a non-flammable blowing agent. HandiFoam E84 Class 1 Spray Foam has been specifically formulated for flame retardancy and conforms to the requirements of ASTM E84 as a "Class 1(A)" system (flame spread of 25 or less, smoke development of 450 or less). The foam helps to lower heating and cooling costs, drastically reducing energy consumption.

Versi-Foam® systems

(A) Versi-Foam®

Versi-Foam® is a portable and disposable low-pressure spray foam insulation system. It is ideal for insulating, air sealing, sound dampening, condensation control, caulking, and void filling. Versi-Foam® applies to commercial and residential construction, plant and facility maintenance, HVAC equipment, roofing repair, marine flotation and insulation, pool and spa insulation, stage/film props, special effects, insulation used within trucks, trailers, buses, RV's, and much more.

- Two-component closed cell spray foam kits
- Patented U-Control dispensing gun provides complete control over how much foam is dispensed
- Excellent air seal
- High R-value per inch
- Energy efficient
- Portable and disposable
- Tack free to touch in 30-40 seconds

Kits include:
- U-Control dispensing gun
- Two hoses
- 10 mixing nozzles
- 3 fan tips
- 1 pair of nitrile gloves
- 1 packet of petroleum jelly
- 1 wrench

(A) Soudal Window & Door Gun Foam

Low pressure formula eliminates windows and doors from bowing. Flame spread 15 and smoke developed 35. UL classified. Soudal Window & Door Foam meets AAMA (American Architectural Manufactures Association) test specifications for low pressure window and door sealant foams (AAMA 812-04).

KEY	SKU	DESCRIPTION	CANS/CASE	CASES/PALLET
A	116889	Soudal Window/Door Foam—24 oz can	12	54

(B) Soudal Fireblock Gun Foam

Soudal Fireblock gun foam is a one component, self expanding, ready to use, fire block, polyurethane orange-colored foam. It contains CFC-free propellants, which are completely harmless to the ozone layer. See ICC-ES Report #ESR-3118.

KEY	SKU	DESCRIPTION	CANS/CASE	CASES/PALLET
B	120919	Soudal Fireblock Foam—24 oz	12	54

(C) Soudal All Season Gun Foam

Soudal All Season Gun Foam is a top of the line, one component moisture curing polyurethane foam developed especially to perform under difficult freezing temperature conditions or in hot conditions where traditional PU foams fail to extrude and cure. The foam will extrude at ambient temperatures as low as -13°F and as high as 120°F with a can temperature of minimum 41°F and maximum 95°F respectively. Cans should be stored at temperatures between 41° and 77°F. AAMA Compliant.

KEY	SKU	DESCRIPTION	CANS/CASE	CASES/PALLET
C	455800	Soudal All Season Gun Foam—24 oz can	12	54

(D) Soudal Soudafoam Flex Gun Foam

Soudal Soudafoam Flex is a one component, moisture curing polyurethane foam developed to be flexible with minimal pressure and unique elastic recovery. Foam extrudes and cures in extreme temperatures from -13°F to 120°F with can temperatures between 41°F and 95°F and will not bend or bow window and door frames.

KEY	SKU	DESCRIPTION	CANS/CASE	CASES/PALLET

(A) Great Stuff™ Pro Window & Door Gun Foam

Minimal expanding, single-component, low-pressure formulation and flexible polyurethane foam sealant. Great Stuff Pro Window & Door foam sealant is exclusively formulated to air-seal the gap between a window or door frame and its rough opening. It expands only enough to generate an effective seal, and makes window and door systems more energy efficient. Proven not to bow windows or doors. Conforms to ASTM and AAMA standards. UL classified—flame spread 10 and smoke developed 20.

KEY	SKU	DESCRIPTION	CANS/CASE	CASES/PALLET
A	FOAMWD	Great Stuff Pro Window & Door—20 oz can	12	64

(B) Great Stuff™ Pro Gaps & Cracks Gun Foam

Minimal expanding, single-component foam, recognized as an alternative fireblock penetration sealant. Evaluated by the International Code Council's Evaluation Service, Inc. for use in residential construction. Great Stuff Pro Gaps & Cracks is tinted orange to be more recognizable to building code officials. UL classified—flame spread 15 and smoke developed 20.

(C) Enerfoam Gun Foam

Premium grade minimal expansion foam with a working temperature range of 25°–120° F. Trimmable in 20 minutes. This closed-cell foam is paintable and waterproof. UL classified—flame spread 15 and smoke developed 20.

KEY	SKU	DESCRIPTION	CANS/CASES	CASES/PALLET
C	ENER4226	Enerfoam—30 oz can	12	64

(D) Contractor Grade Window & Door Insulating Foam Sealant

Contractor Grade Insulating Foam Sealant – Door & Window is a one component, expanding, low pressure-build, flexible polyurethane foam exclusively formulated to air seal the gap around a window or door frame and rough opening. Foam expands to generate an effective seal, and when applied properly is proven not to distort or bow window and door frames.

KEY	SKU	DESCRIPTION	CANS/CASES	CASES/PALLET
D	CGWD	Contractor Grade Window & Door - 20 oz can	12	64

(E) Contractor Grade Gaps & Cracks Insulating Foam Sealant

Contractor Grade Insulating Foam Sealant – Gap Filler is a single component, expanding polyurethane foam sealant for general purpose building envelope air sealing. It expands to take the shape of gaps and cracks, forming an airtight and water resistant bond to wood, metal, masonry, glass and most plastics. It is also recognized as a fireblock sealant and is orange colored for easy recognition.

E	CGGC	Contractor Grade Gap Filler/Fireblock—20 oz	12	64

(F) Dow Great Stuff Gasket Foam

Great Stuff Pro™ Gasket is designed to form a gasket-in-place foam where it is applied to the interior face of framing lumber, especially top and bottom plates, inside and outside corners and around rough openings. Effective at blocking air leaks past the top plate into the attic and through the bottom plate and the rim joist.

- Rapid installation from an aerosol can on a Pro gun —no power tools needed
- Water-based and water clean-up before cure
- Flexible and easily compressible
- Seals over rough framing features, joist hangers, strapping, etc

(A-C) Two-Component Spray Foam – DOW Froth-Pak™

Two-component polyurethane spray foam that comes in portable kits. Ideal as an insulator and air-sealant, Froth-Pak bonds to most construction materials including lumber, plywood, particle board, foam board, masonry, metals, drywall, concrete and foam panels. Flame spread of 25 or less. Smoke development of 450 or less. It can be used to fill cavities, wall and floor penetrations, cracks and expansion joints. Includes 15' hose.

(A) The Shoot™

The Shoot™ is a patented, effective way to insulate open framed areas in new construction applications of residential and commercial buildings, as well as room additions and remodeling projects. The Shoot™ has been researched and developed to be the perfect tool for the spray foam industry, spray-on systems and blow-in blanket systems. It is 6' in length and manufactured to fit 16" and 24" on center openings. With several scored edges, it can also fit odd sized openings.

KEY	SKU	DESCRIPTION	MIN QTY
A	SH016	The Shoot, 16" X 72", 50/Bundle, 500/Pallet	50
	SH024	The Shoot, 24" X 72", 50/Bundle, 500/Pallet	50
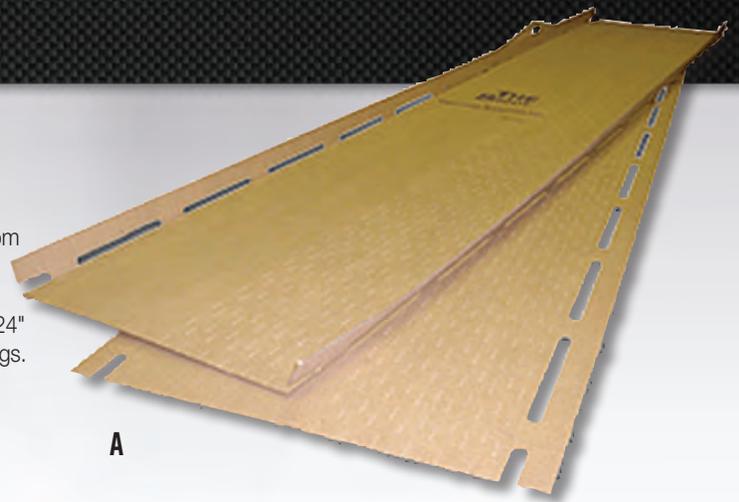

(B) 2-Gallon Pail and Spray Foam Cylinder Warming Wrap

Pail warmer will warm a two gallon can or a 200 Bd Ft foam kit cylinder. Made from heavy duty nylon CPAI 84 which creates a heat retaining flexible barrier. Insulated with closed cell polypropylene with an enclosed heating element. Plugs into a 120V AC or 12V DC inverter using a heavy duty industrial cord. Voltage: 120 VAC - 80 Watts
- Velcro closure and elastic top. • Measures 8" high x 29" long.

KEY	SKU	DESCRIPTION	MIN QTY
B	PWW	Wrap—2-gallon warmer	each

(C) 5-Gallon Spray Foam Cylinder Warming Wrap

This pail warmer will warm a five gallon can or a 620 Bd Ft foam kit cylinder. It is made from heavy duty nylon CPAI 84 which creates a heat retaining flexible barrier. It is insulated with closed cell polypropylene with an enclosed heating element. It plugs into a 120V AC or 12V DC inverter using a heavy duty industrial cord.
- Convenient cord storage pouch on the front
- Velcro closure and adjustable cinch straps for a snug fit
- Measures 11.5" high x 41" long

(A) FOAMZALLV18

The FOAMZALLV18 Milwaukee® brand M18 FUEL™ SAWZALL® Reciprocating Saw from Milwaukee Tool is the fastest saw in its class, offering up to 2X more runtime, 30% faster cutting, and 5X longer tool life of competitive saws. The POWERSTATE™ brushless motor provides cutting power that has only been associated with corded tools. The M18™ REDLITHIUM™ XC4.0 Extended Capacity Battery Pack delivers up to 2X runtime and provides more work per charge and more work over the life of the pack than competitive batteries. Comes with (1) M18 FUEL™ SAWZALL® Reciprocating Saw, (2) M18™ REDLITHIUM™ XC 4.0 Extended Capacity Battery Pack, (1) M18™ & M12™ Multi-Voltage Charger and (1) Carrying Case.

(D) Super Shear Foam Saw

The Super Shear V3 foam saw has a 1–1/8 inch stroke.
This saw will cut open and closed cell foam with great efficiency.
The longer stroke allows you to cut at a slower rpm (which reduces vibration) but still get excellent cutting speed. It is your dream come true for cutting spray polyurethane foam!

- 1–1/8 inch stroke
- Absolutely maintenance free
- Amps: 11
- Stokes per minute: 0-2800
- Weight: 8.5 pounds
- Blade Mount: 2 screws
- Trim walls up to 10 feet tall

(A) Boss 139 Fire Mortar

Low cost, non-combustible fireplace mortar that passes ASTM E-136 and has been tested to 3000°F. Can also be used in residential firestop applications where the building code calls for a non-combustible material.
• Ideal for sealing fireplaces and wood burning stoves

KEY	SKU	DESCRIPTION	TUBES/CASE	CASES/PALLET
A	CLK139	Boss 139 fire mortar—Black	12	108

(B) Boss 136 Fireblock Draftstop Sealant

Single component fire rated sealant and non-combustible filler caulking. Used in the annular space around wires, pipes, ducts, vents, cable lines and other penetrations to the building envelope. Applicable standards include: UBC page 1–387, 1997 edition, CABO section 602.7 item 4, 1995 edition, BOCA (NBC) 704.4.1.1 1996 and ASTM E-136.

KEY	SKU	DESCRIPTION	TUBES/CASE	CASES/PALLET
B	CLK136	Boss 136 firestop/draft sealant	12	108

(C) Boss 816 Intumescent Firestop Sealant

Single component, non-sag, water-based sealant and smoke seal that is easy to apply and clean up. Prevents the spread of toxic gases, water, smoke and fire through joint openings. Meets ASTM E-814 (UL 1479), standard test method for fire tests of through-penetration firestops. Conforms to BOCA National Building Code (1996), CABO one and two family dwelling code (1995), Uniform Building Code (1997). See UL Fire Resistance Directory for a list of systems established for Boss 816.

KEY	SKU	DESCRIPTION	TUBES/CASE	CASES/PALLET
C	CLK816	Boss 816 intumescent	12	108

(D) Boss 125 Multi-Seal Construction Sealant

Formulated to offer outstanding primerless adhesion to most common building materials including vinyl, aluminum, steel, concrete, wood and glass. It can be applied and tooled under most weather conditions. This sealant is paintable with most latex base paints.

KEY	SKU	DESCRIPTION	TUBES/CASE	CASES/PALLET

(G) Fire Seal FS136

FIRE SEAL is tested to meet and exceed ASTM-E136 and ASTM-E814 standards for fireblocking/firestopping single-family residential construction. Fire Seal possesses superior adhesion and freeze-thaw characteristics and is the contractors' #1 choice for fireblocking non-rated wood-frame construction. Fire Seal will not shrink, crack, or crumble upon cure. Fire Seal creates an air-tight barrier to prevent passage of flames, smoke, and toxic gases from spreading area to area within concealed spaces.

KEY	SKU	DESCRIPTION	TUBES/CASE	CASES/PALLET
G	CLKFS136	Fire Seal 136 Fireblock 10.3 oz tube	12	120

(H) Manus-Bond 50-AC Acoustical Sealant

Non-drying butyl, synthetic rubber-based sealant for reducing sound and vapor transmission in partition systems. It remains flexible for a long-lasting, resilient, and acoustical seal. Conforms to CAN/CGSB 19.21 M87.

KEY	SKU	DESCRIPTION	TUBES/CASE	CASES/PALLET

(A) White Sheathing Tape

White sheathing tape with pressure sensitive adhesive that is aggressive and permanently tacky at room temperature when applied using light pressure to the substrate. Application temperature from 10° F ~ 230° F. Pinked edges for easy tearing.

KEY	SKU	DESCRIPTION	ROLLS/CASE	CASES/PALLET
A	TS2WH24P	2" x 55 yd, White Sheathing Tape, Pinked	24	36

(B) Red Sheathing Tape

Constructed of a 1.5 mil polypropylene film with excellent tensile strength. Designed for permanently sealing or repairing a variety of surfaces over a wide range of temperatures and moisture conditions. Product possesses an aggressive acrylic adhesive bonding strength.

KEY	SKU	DESCRIPTION	ROLLS/CASE	CASES/PALLET
B	TS2R36	2" x 55 yd, Red Sheathing Tape	36	24
	TS2R12	2" x 55 yd, Red Sheathing Tape	12	72

(C) Red Sheathing Tape

The pressure sensitive adhesive (PSA) is aggressive and permanently tacky at room temperature when applied using light pressure to the substrate. The Polyester (PET) backing which gives the tape excellent mechanical characteristics and high resistance to moisture, solvents, oil and various chemicals. Pinked edges for easy tear. Application temperatures of 0° F to 110° F.

KEY	SKU	DESCRIPTION	ROLLS/CASE	CASES/PALLET
C	TS3R16	2.85" x 55 yd Red Sheathing Tape, Pinked	16	36

(D) Aluminum Foil Tape

Aluminum foil tape is ideal for sealing joints and seams against moisture and vapor on foil jacketing insulation. Tape has soft aluminum foil with acrylic adhesive and protected by an easy release liner. Suitable for many other permanent sealing, holding or masking applications requiring the protection offered by a foil backing. Service temperature -22° F ~ +248° F. Application temperature +23° F ~ +104° F.

KEY	SKU	DESCRIPTION	ROLLS/CASE	CASES/PALLET

A

(A) ADO Pro Pac

ADO Pro Pac fabric is ideal for knee walls, sound walls and many other applications. Keep your job site dust levels down to a minimum. Our best value, high quality non-woven netting is made of 100% polypropylene point bonded material. Rolls are folded for greater convenience when moving quickly through the job site installation. ADO Pro Pac is not the preferred fabric for wet/damp spray installations - See line (D) ADO Pro Web SKUs for this application.

KEY	SKU	DESCRIPTION	MIN QTY	ROLLS/BAG	ROLLS/PALLET

(A) Allegro Full Mask Continuous Flow Supplied Air Respirator for SAR System

Made of silicone rubber for durability and will hold its shape even in extreme heat and cold. Double sealing flange provides an improved face-to-mask seal and a deep chin pocket provides a better, more comfortable fit. Replaceable polycarbonate lens offers a wider, distortion-free viewing area with an anti-fog, anti-scratch coating. Unique "over the shoulder" hose design clips at the collar. Comes with OBAC quick connects. NIOSH approved.

KEY	SKU	DESCRIPTION	MIN QTY

MOLDEX®

Ideas that wear well.®

Moldex® Disposable and Reusable Respirators

Breathe easy with a Moldex disposable particulate respirator. They're NIOSH certified to have a filter efficiency of 95% or greater against particulates free of oil. That's some clean air. Enjoy a contoured nose bridge and a soft foam nose cushion for comfortable seal—without a metal nose band. The exclusive Dura-Mesh® shell protects the filter media so it stays clean longer. It's built to resist collapsing in hot and humid conditions so the respirator holds its shape longer. Bottom line—fewer respirators are used = you save money.

D

(A) Moldex 2600 N95 Respirator, HandyStrap®

B	**MK6025W**	Clear E-2 Flex hose—6" x 25'	each

(C) Urethane Flex Hose

Very lightweight clear polyurethane hose reinforced with a spring steel wire helix that provides excellent flexibility. The smooth bore offers a combination of efficient flow characteristics and abrasion resistance. Moisture resistant, temperature range -65° F to 200° F.

KEY	SKU	DESCRIPTION	MIN QTY
C	**FT2050**	Clear Urethane Flex hose—2" x 50'	each
	FT2550	Clear Urethane Flex hose—2-1/2" x 50'	each
	FT3050	Clear Urethane Flex hose—3" x 50'	each
	FT3550	Clear Urethane Flex hose—3-1/2" x 50'	each
	FT4050	Clear Urethane Flex hose—4" x 50'	each
	FT6025	Clear Urethane Flex hose—6" x 25'	each

(D) Flex Tube Hoses

Medium weight clear co-extruded elastomer with a rigid green external polypropylene helix. Spiral co-extruded engineered construction with environmentally friendly PVC. Ultra smooth interior assures efficient airflow. Good chemical and abrasion resistance. Helix acts as a wearstrip.

KEY	SKU	DESCRIPTION	MIN QTY
D	**MKFT4050**	Hose, Flex-Tube EF 4" x 50' clear w/green helix	each
	MKFT6025	Hose, Flex-Tube EF 6" x 25' clear w/green helix	each
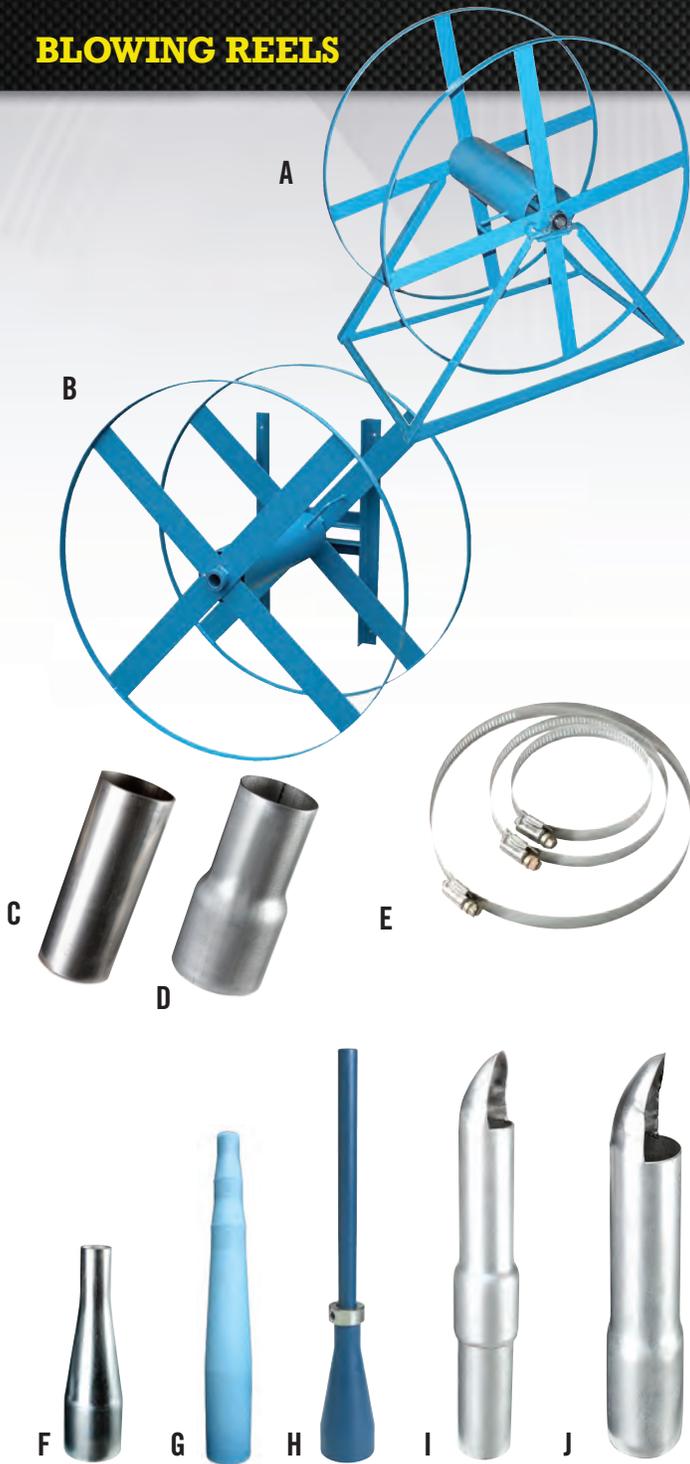

(A-B) Hose Reels

All hose reels have heavy duty bearings. The large hose reel stands upright and the extra large hose reel is to be wall mounted.
- X-Large reel holds: 150' of 4" hose, or 200' of 3-1/2" hose
- Large reel holds: 150' of 3" hose, 200' of 2-1/2" hose, or 250' of 2" hose

KEY	SKU	DESCRIPTION	MIN QTY
A	HR300	Large, 36" L x 23" W x 39" H	each
B	HR350	X-Large, 44" Dia x 28" W	each

(C) Steel Connectors

Provide durable, secure links between hose sections. Inside extensions are long enough to safely attach clamps for secure fits.

KEY	SKU	DESCRIPTION	MIN QTY
C	SC200	Steel connector—2"	each
	SC250	Steel connector—2-1/2"	each
	SC300	Steel connector—3"	each
	SC349	Steel connector—3-1/2"	each
	SC400	Steel connector—4"	each
	SC600	Steel connector—6"	each

(D) Steel Reducers

KEY	SKU	DESCRIPTION	MIN QTY
D	RC252	Steel reducer—2-1/2" to 2"	each
	RC320	Steel reducer—3" to 2"	each
	RC325	Steel reducer—3" to 2-1/2"	each
	RC352	Steel reducer—3-1/2" to 2-1/2"	each
	RC353	Steel reducer—3-1/2" to 3"	each
	RC430	Steel reducer—4" to 3"	each
	RC435	Steel reducer—4" to 3-1/2"	each
	RC640	Steel reducer—6" to 4"	each

(E) Hose Clamps

Steel clamps with worm drive adjust to fit 2", 2-1/2", 3", 3-1/2", 4" or 6" connectors, reducers or nozzles.

KEY	SKU	DESCRIPTION	MIN QTY
E	CL100	Hose clamp—2" to 3"	each
	CL400	Hose clamp—4"	each
	CL600	Hose clamp—6"	each

DRY-SPRAY NOZZLES

(F-J) Dry-Spray Nozzles

We offer a wide variety of sizes and types of steel nozzles.

KEY	SKU	DESCRIPTION	MIN QTY
F	RN210	Steel reducing nozzle—2" to 1"	each
	RN214	Steel reducing nozzle—2" to 1-1/4" (not shown)	each
	RN215	Steel reducing nozzle—2" to 1-1/2" (not shown)	each
G	BR211	Plastic Reducing nozzle—2" to 1" or 1-1/2"	each
H	BN2625	Brick Reducing Nozzle—2" to 5/8"	each
I	DS201	Directional swivel nozzle—2"	each
	DS251	Directional swivel nozzle—2-1/2"	each
	DS252	Directional swivel reducer—2-1/2" to 2"	each
J	DS200	Directional nozzle—2"	each
	DS250	Directional nozzle—2-1/2"	each

(K) Intec Swivel Connectors

Swivel hose connectors can be used for blowing or vacuum applications. They provide the installer freedom and agility to move around by reducing tangles and kinks in the hose.

KEY	SKU	DESCRIPTION	MIN QTY
K	J52053	3" Straight Swivel Hose Connector	each
	J52058	4" Straight Swivel Hose Connector	each
	J52054	6" Straight Swivel Hose Connector	each

MOISTURE METERS

(A-B) Moisture Meters

The perfect tool for making sure the moisture level in a sprayed wall is within the acceptable range. The analog meter is great for testing moisture in sprayed fiberglass and rockwool, while the LED meter is perfect for cellulose spray applications.

KEY	SKU	DESCRIPTION	MIN QTY
A	MM100	Moisture meter, analog (reads up to 40%)	each
B	MM200	Moisture meter, LED (reads up to 90%)	each

(C) Graphite Powder

Reduces static electricity and friction. Occasionally blend one or two cans with cellulose and run through the blower and hose.

KEY	SKU	DESCRIPTION	MIN QTY	QTY/CASE
C	PG430	Graphite powder—16 oz can	1 can	12

(D) Attic R-Value Rulers

Highly visible attic rulers are printed on one side and measure up to 24" of insulation.

KEY	SKU	DESCRIPTION	QTY/BOX
D	RT240N	24" R-Value Rulers	225
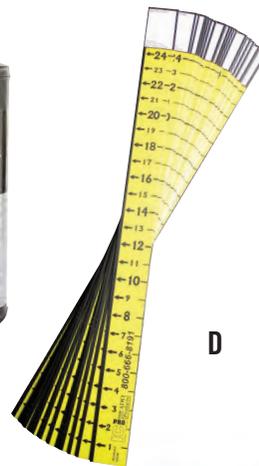

WATER INJECTION SLEEVES

(E) Hydra-cone Water Injection Sleeves

Hydra-cone water injection sleeves are used for dust suppression, fireproofing and stabilizing applications. Available in 2" through 4". Comes with low pressure (25-50 psi) internal tip. High pressure tips (100 psi and above) available upon request.

KEY	SKU	DESCRIPTION	MIN QTY
E	14025	Sprayco Nozzle 2.5" Hydra-cone Water Injection Sleeve	each
	14030	Sprayco Nozzle 3" Hydra-cone Water Injection Sleeve	each
	14040	Sprayco Nozzle 4" Hydra-cone Water Injection Sleeve	each

(F-G) Sprayco Nozzle, 4" Standard Water Sleeve (4003)

Perfect for dust suppression and stabilizing cellulose.

KEY	SKU	DESCRIPTION	MIN QTY
F	HOS116	Sprayco Nozzle, 3" Standard Water Sleeve	each
G	HOS149	Sprayco Nozzle, 4" Standard Water Sleeve (4003)	each

C

(A) Krendl 425 Blowing Machine

The Krendl 425 is designed for low maintenance, rugged performance, and portability. Provides large hopper capacity with user friendly controls.
Specifications:

- Light weight machine: 220 lbs
- User friendly electric panel
- Hopper capacity: 7 Cubic ft.
- 2.5" Outlet
- Power requirements:
  Single input: 15 AMP, 120 volt/60hz
  Double input: 15/15 AMP, 120 volt/60hz
- Output: Fiberglass: 200 lbs/hour (8 AMP Blower),
  480 lbs/hour (14 AMP Blower)

  Cellulose: 1100 lbs/hour (8 AMP Blower)
  1400 lbs/hour (14 AMP Blower)
- **Power cords not included**

KEY	SKU	DESCRIPTION	WEIGHT (LBS)
A	**KM425**	Blowing Machine, Krendl 425, Single Input, 8 AMP Blower	220
A	**KM425D**	Blowing Machine, Krendl 425, Double Input, 14 AMP Blower	220

(B) Krendl 475 Blowing Machine

The Krendl 475 is an economical machine for the professional contractor. Designed for low maintenance and high production, the 475 provides a large easy loading hopper while offering simple rugged performance.
Specifications:

- User friendly electronic dashboard
- Double 14 Amp / 2 stage blowers
- Clear acrylic safety guard for easy inspection
- LED start and stop buttons and Digital voltmeter
- Dual variable blower controls
- 3" Outlet
- Semi pneumatic run flat treaded tire
- Hopper capacity: 14 Cubic ft.
- Power requirements:
  Double input: 15/15 AMPs each, 120 volt/60hz
- Output: Fiberglass: 700 lbs/hour
  Cellulose: 2100 lbs/hour
- **Power cords not included**

KEY	SKU	DESCRIPTION	WEIGHT (LBS)
B	**KM475**	Blowing Machine, Krendl 475, Double input	355

(C) Krendl 575 Blowing Machine

The Krendl 575 provides the highest production in its class for all brands of cellulose and fiberglass. Designed with the professional contractor in mind, the 575 will outperform and outlast the competition.
Specifications:

- Lightest machine in its class
- User friendly electronic dashboard
- Double 14 Amp / 2 stage blowers
- Clear acrylic safety guard for easy inspection
- LED start and stop buttons
- Dual variable blower controls
- Digital voltmeter
- Semi pneumatic run flat treaded tires
- Hopper capacity: 14 Cubic ft.
- 3" Outlet
- Power requirements:
  Double input: 30/15 AMPs each, 120 volt/60hz
  Single input: 30 AMP, 240 volt/60hz
- Output: Fiberglass: 800-1000 lbs/hour
  Cellulose: 2600-2800 lbs/hour
- **Power cords not included**

KEY	SKU	DESCRIPTION	WEIGHT (LBS)
C	**KM575D**	Blowing Machine, Krendl 575, Double input	380
C	**KM575S**	Blowing Machine, Krendl 575, Single input	380

Power Cords – Twist Plug

Twist plug heavy duty all weathered extension cords for use with Krendl Blowing machines.

KEY	SKU	DESCRIPTION	MIN QTY
	EXTCORDG	Krendl, 50' 8-4 W/ 30 amp	each
	EXTCORDH	Krendl, 100' 8-4 W/ 30 amp cord	each

(A) Krendl 2300 Blowing Machine

Specifically designed for contractors to provide a smaller footprint while capable of blowing all brands of cellulose and fiberglass.
Specifications:

- User friendly electronic dashboard
- 2 HP direct drive motor/reducer
- Hopper capacity: 40 Cubic ft.
- Power requirements:
  Double input: 30/20 AMPs each, 120 volt/60hz
  Single input: 30 AMP, 240 volt/60hz
- Output: Fiberglass:1000 lbs/hour
  Cellulose: 3000 lbs/hour
- **Power cords not included**

- Double blower sytem
- Slide Out Airlock system
- Clear acrylic safety guard allows for easy inspection
- Built in tool holder
- 3" Outlet

A	KM2300S	Blowing Machine, Krendl 2300, Single input	846
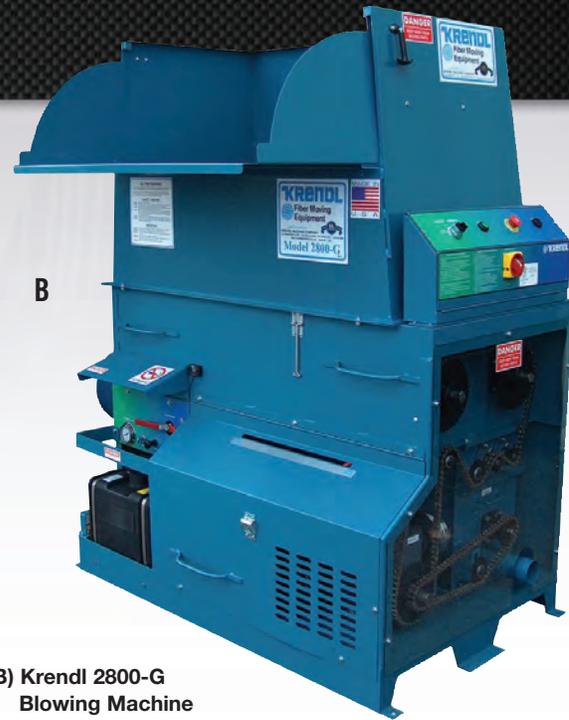

(B) Krendl 2800-G Blowing Machine

Specifically designed for contractors to provide a smaller footprint while capable of blowing all brands of cellulose and fiberglass.
Specifications:

- Removable all steel airlock allows quick access for maintenance
- 18 HP Briggs & Straton V-Twin gas engine w/positive pressure lubrication system
- User friendly 12V DC electric dashboard
- 5 gallon fuel tank
- Clear acrylic safety guard allows for easy inspection
- 3" Outlet
- Hopper capacity: 40 Cubic ft.
- Output: Fiberglass: 2100 lbs/hour
  Cellulose: 3600 lbs/hour

KEY	SKU	DESCRIPTION	WEIGHT (LBS)
B	KM2800G	Blowing Machine, Krendl 2800-G, Gas Powered	1224

(C) Krendl 4000-G-A

Maximize your production with your 4000-G-A all fiber machine. Designed for low maintenance and high production, the 4000-G-A with its additional agitation provides a large easy loading hopper with adaptable fold-down folding door while offering simple rugged performance. Durable powder coat finish

Specifications:

- Removable all steel airlock allows quick access for maintenance
- User friendly 12 VDC electric dashboard
- Control panel with engine controls, pressure gauge and air bleed off
- 4.75 gallon fuel tank w/emergency shut off
- Hopper capacity: 62 Cubic ft.
- Positive Displacement Blower
- 4" Outlet
- Output: Fiberglass: 2200 lbs/hour
  Cellulose: 4800 lbs/hour

(A) INSULMAXX - IM1000 Blowing Machine

Small, rugged & portable, this is the perfect machine for the D-I-Y application, fireproofing patcher, or a recycle machine for wall spray.
Specifications:

- Drive Motor: 1/8 HP Gear Reduction
- Blower Motor: 3/4 HP
- Power requirements: 1 - 15 amp 110 VAC circuit
- Outlet Size: 2.5"
- Airlock: 18" x 6"
- Size: 36"H x 24"W x 22"D
- Hopper Capacity: 5 Cubic ft.
- Output: 750 lbs per hour (cellulose)

KEY	SKU	DESCRIPTION	WEIGHT (LBS)
A	IM1000	Blowing Machine, InsulMaxx 1000 (115 Vac)	120

(B) INSULMAXX - IM2000 Blowing Machine

An excellent insulation machine for the contractor who is just starting in the business. Double agitators assure smooth and accurate fiber conditioning. Variable air pressure, 18" airlock for blowing or spraying.
Specifications:

- Drive Motor: 1 HP
- Blower Motor: 1.5 HP
- Power Requirements:
   2-15 amp 115 VAC circuits
- Control System:
   24 Vdc w/100' Remote
- Outlet Size: 2.5"
- Airlock: 18" x 6"
- Size: 48"H x 24"W x 22"D
- Hopper Capacity: 8 Cubic ft.

- Output:
   Cellulose: 1,350 lbs per hr
   1,000 Sq ft per hr
   (2" x 4" wall spray)

   Fiberglass: 300 lbs per hr

   Rockwool:
   Results vary by manufacturer

KEY	SKU	DESCRIPTION	WEIGHT (LBS)
B	IM2000	Blowing Machine, InsulMaxx 2000 (2, 115 Vac)	160

(C) INSULMAXX - IM4000 Blowing Machine

The InsulMaxx 4000 is the highest production 115Vac electric all-fiber machine available. Includes 2 HP air pressure system with high precision conditioning cards and a material feed control unit.

Specifications:

- Drive Motor: 1 HP
- Blower Motor: 1-2 HP
- Power Requirements:
   2-15 amp 115 VAC circuits
- Control System:
   24Vdc w/100' Remote
- Outlet Size: 3"
- Airlock: 10" x 10"
- Size: 56"H x 38"W x 26"D
- Hopper Capacity: 14 Cubic ft.

- Output:
   Cellulose: 1800 lbs per hr
   1,100 Sq ft per hr (2" x 4" wall spray)
   Fiberglass: 450 lbs per hr

   Rockwool:
   Results vary by manufacturer

KEY	SKU	DESCRIPTION	WEIGHT (LBS)
C	IM4000	Blowing Machine, InsulMaxx 4000 (2, 115 Vac)	390

(D) INSULMAXX - IM5000 Blowing Machine

Approved for use with industrial coatings and all fireproofing fibers. Includes a specialized 2-step agitation system, using auger style paddles followed by a series of conditioning cards. Variable speed drive system ensures high volume production utilizing two 2 HP blowers, allowing control for smooth spraying.

Specifications:

- Drive Motor: 1.5 HP
- Blower Motor: 2-2 HP blower
- Power Requirements:
   1-20 amp 220 VAC circuit
- Control System:
   24Vdc w/100' Remote
- Outlet Size: 3"
- Airlock: 10" x 10"
- Size: 56"H x 38"W x 26"D
- Hopper Capacity: 14 Cubic ft.

- Output:
   Cellulose: 2,100 lbs per hr
   1,200 Sq ft per hr (2" x 4" wall spray)
   Fiberglass: 600 lbs per hr

   Rockwool:
   Results vary by manufacturer

Relton Tooth Hole Saws

Ideal for cutting holes to install fiberglass, cellulose and other injected insulation. Carbide tips are brazed to the hole saw body with special high-temperature silver solder. Elongated slots allow easy plug removal. Consistently cut round holes are easily patched with wood or plastic plugs. Complete saws include cutter head, shank and carbide pilot.

(A) Relton Carbide-Tooth Stucco Hole Saws

Stucco saw cuts stucco, mesh, asbestos or aluminum siding.

KEY	SKU	DESCRIPTION	MIN QTY
A	RSS100	Relton carbide-tipped stucco saw—1"	each

	MHS38	Hole saw mandrel—3/8"	each
H	MHS12	Hole saw mandrel—1/2"	each

Wood Boring System

One-piece construction bits with cutter blades welded to shanks. They are self-feeding with one replaceable pilot screw that fits all sizes, eliminating the need to match parts. The black oxide finish is rust resistant. The easy to use, fast cutting bits won't separate when backing out, and they're easy to sharpen with only two cutters.

(A) Self Feed Wood Bits

Automatic-feed wood bits feature outside diameter threads and replaceable lead screws.

KEY	SKU	DESCRIPTION	MIN QTY
A	SFWB1	Bit—1" self-feed, wood	each

Hole Saws

Long-lasting carbide-tipped and bi-metal hole saws. Arbor, standard and carbide-tipped pilots sold separately.

(D) Bi-Metal Hole Saws

Bi-metal construction with a high-speed steel cutting edge. Vari-Tooth design creates sharper tooth tips for faster, freer cutting. Cutting depth is 1-1/2". Positive rake tooth creates a more aggressive cutting action than conventional tooth styles.

KEY	SKU	DESCRIPTION	MIN QTY
D	BHS1	Bi-metal hole saw—1"	each

	SS7550	Sill Seal—7-1/2" x 50'	roll

(B) 3M Vinyl Foam Sealant Tape

A specially formulated pressure sensitive adhesive system applied to a very flexible, closed cell vinyl foam. The vinyl foam tape is grey in color and has a density of 10 lb. per cubic foot.

KEY	SKU	DESCRIPTION	ROLLS/CASE
B	TVFS1714	3M Vinyl Foam Sealant Tape (3/8" x 1/4") x 50'	32

(C) Dow Great Stuff Gasket Foam

Great Stuff Pro™ Gasket is designed to form a gasket-in-place foam where it is applied to the interior face of framing lumber, especially top and bottom plates, inside and outside corners and around rough openings. Effective at blocking air leaks past the top plate into the attic and through the bottom plate and the rim joist.

- Rapid installation from an aerosol can on a Pro gun —no power tools needed
- Water-based and water clean-up before cure
- Flexible and easily compressible
- Seals over rough framing features, joist hangers, strapping, etc

KEY	SKU	DESCRIPTION	CANS/CASE
C	DGASK	Dow Drywall Gasket Foam—18oz	12

(D-E) Dow Great Stuff Drywall Gasket Dispensing Gun

Designed specifically for Great Stuff Pro™ Gasket, the blue-handled dispensing gun – colored to match the cans – allows for precise application of the foam. The gun is restartable, reusable and can be easily cleaned using a garden hose and the included cleanout adapter.

(A) Draftmaster Attic Stairway Insulators

The Draftmaster Attic Stairway Insulator insulates and seals the drop down attic stairway. Offers R-Value of 15, reflects 96% of radiant heat. They offer a no trip opening and easy open zipper. The seams are double stitched for extra support increasing the product's lifespan. Installs in 5 minutes or less. Draftmasters utilize radiant foil on both sides of the insulator, not just one side.10-year warranty.

B

(B) Pull Down Ladder Jacket with Pocket

This Easy-to-install insulator closes the insulation gap created by attic stair access. The insulator is comprised of durable, highly reflective foil. There is no assembly required. The lightweight design provides comfort for your home year-round. The insulator is available with a patented insulation chamber that provides high thermal value over the attic stairway/ladder entrance.

- Tested for ASTMC518 and is rated up to R58
- Very durable. Comes with SCRIM protection
- 99.8% aluminum material
- Class "A" fire rated
- Class 1 vapor retardant

C

(A) TENMAT Recessed Light Covers

Made out of a fire-resistant mineral wool that exhibits excellent thermal insulating properties. Compatible with sprayed foam insulation, low density foam, blown-in insulation and lay-in insulation. Can be used with IC Rated and non-IC Rated lights.

KEY	SKU	DESCRIPTION	MIN QTY
A	FF130E	15"L x 14"W x 9"H	each
	FF135	16-1/2" Diameter x 11"H	each

(B) Insul-Shield

Your best protection against fire caused by heat build-up from insulating over or too close to non-IC-rated recessed lights, or other heat-producing fixtures. 14" x 24' roll makes about six to eight shields.
• Lightweight 30-guage aluminum material
• Safe for use with cellulose, fiberglass and rockwool insulation

KEY	SKU	DESCRIPTION	MIN QTY	ROLLS/CARTON
B	IS1424	14" H x 24' L roll	1 roll	12

(C) Poly Recessed Light Cover

A great way to get an airtight seal over IC-rated recessed lights for new or retrofit applications. Not to be used on non-IC-rated lights.
• Made of an extra heavy grade of polyethylene film
• Pre-formed to fit over most light cans

KEY	SKU	DESCRIPTION	MIN QTY
C	SVB18	12"W x 18"L x 8"H	each

(D-E) The Insul-Lite® Pro Plus Recessed Light Cover

Fire retardant cover designed to allow the installer to insulate safely and effectively around recessed lights. When installed, the Insul-Lite® allows insulation to be placed as close to the light or heat producing fixture as possible without the risk of fire. Use vented Insul-Lite® covers for non-IC Rated lights and solid covers for IC Rated lights.

(F) Superior F2 Facing

Superior F-2 radiant insulation is composed of aluminum foil laminated with flame retardant adhesive to both sides of 100 lb Kraft paper.

KEY	SKU	DESCRIPTION	MIN QTY
F	CANLIGHTF2255	100 lb Kraft paper roll 25-1/2" x 118'	each

(G-H) CanCoverIt™ Recessed Light Cover

CanCoverIt™ is essential to ensure maximum comfort and building envelope performance. CanCoverIt™ even helps protect and maximize LED bulb life. Use on non-IC recessed lights, IC recessed lights, LED inserts, bathroom exchange fans, speakers and more! Eliminates drafts, maximizes building insulation, protects against pests and moisture, and reduces load on HVAC systems. Unique design controls airflow and stops thermal conductance, providing the optimum protection needed to fully insulate for all climates. CanCoverIt™ Universal Series has pop-out vents to allow installation on a wide range of fixtures, designed for safe use with Non-IC recessed lights. CanCoverIt™ Low Profile series is air-tight with a shorter height specifically designed for IC-rated fixtures. Both CanCoverIt™ series ship flat, pop open and install in seconds!

E
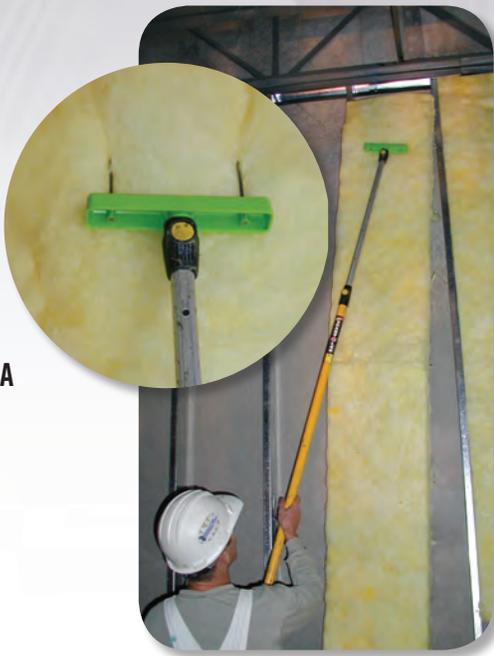

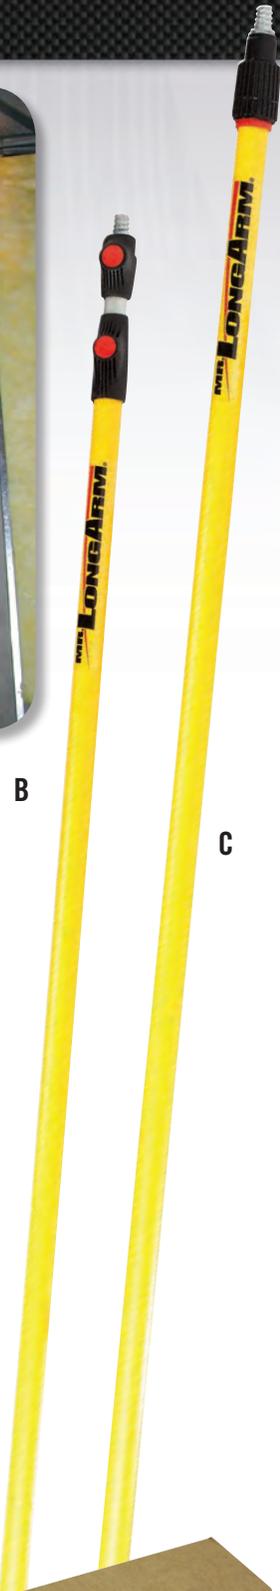

(A) The Installer

The batt installer screws onto the tip of the BI7710 and BI6512 extension poles, allowing for easy installation of pressure-fit batt insulation and wire batt supports in both overhead and wall installations.

KEY	SKU	DESCRIPTION	MIN QTY
A	BI102	The Installer, Batt Installation Tool	pair

(B) Smart-Lok® Extension Poles

Quickly change roller frames or other tools with the push of a button for Quick-on/Quick-off action.

* Heavy-duty composite fiberglass handle
* Patented locking device

KEY	SKU	DESCRIPTION	MIN QTY
B	BI7710	Smart-Lok extension pole—5' to 9'	each

(C) Twist Lock® Extension Poles

Combination smooth composite fiberglass handle and aluminum tube for balance. Die cast metal 3/4" (2 cm) threaded end and heavy duty chuck and collet locking device.

KEY	SKU	DESCRIPTION	MIN QTY
C	BI6512	Twist Lock extension pole—6' to 12'	each

(D) Pro Wall Strapping Material

This material is ideal for supporting fiberglass batts and is a true economic alternative to duct strapping. Made from 100% polyester so there is a low propensity for mold growth. Available in rolls of 2" x 250'.

KEY	SKU	DESCRIPTION	MIN QTY
D	PW402250	ADO Pro Wall—2" x 250'	roll

(E) Wire Batt Supports
(also known as tiger teeth, wire stays and lightning rods)

Fastest, most economical method of installing roll and batt type insulation. Made of high tensile wire with angle cut to dig into wood. When installing batt supports space them 12" to 16" apart.

* Spring wire supports install with a twist of the wrist
* Holds permanently in floors, walls and ceilings

KEY	SKU	DESCRIPTION	QTY/BOX

	BS280	Wire batt supports—28"	500

(A) Insul-Hold

Unique design simplifies installation. Insulation is impaled on the 2-1/2" arrow prongs which are on 8" centers. Use with either 16" or 24" OC. Product is .025 to .028 thick and 1" wide. It is cold rolled and hot dipped galvanized with a dry finish.
• Holds rigid or batt insulation
• Doubles as reinforcement strapping

KEY	SKU	DESCRIPTION	MIN QTY
A	IH660	Insul-Hold—100' roll	1 Roll

(B) Standard Insulation Anchors

Glued in place and used to support rigid board and batt type insulation on wall and ceiling applications. The anchors incorporate a 12-gauge spindle (nail) and a 2" x 2" square perforated base made of low carbon steel, galvanized coating.

KEY	SKU	DESCRIPTION	QTY/CARTON

REFLECTIVE PRODUCTS:

R+Heatshield - RADIANT BARRIERS:
R+Heatshield is perfect over attic insulation (use perforated type), under rafters and over crawl spaces. It works as a complete insulation for metal and post-frame buildings, garages and garage doors. The solid type is ideal wherever a vapor and air infiltration barrier is needed. Perfectly safe to use, requiring no special breathing or handling precautions.

Tuff-Stuff - CONCRETE INSULATION:
High-strength insulating moisture barrier for use below heated concrete floors.

Astro-Shield - REFLECTIVE INSULATION:
Insulation material ideal for retrofit or new construction applications in commercial, industrial and agricultural pre-engineered metal and post-frame buildings. Its unique composite design consists of polyethylene air bubble pockets sandwiched between thin layers of reflective film. In many applications, Astro-Shield is more effective than 3" to 6" of conventional mass fiber insulation.

- Keeps buildings warmer in winter and cooler in summer
- Non-carcinogenic
- Lightweight material is thin, pliable and easy to install, and has little or no affect on building design loads
- Compact design works well in limited spaces–easy to ship/store
- Tough surfaces are wear and puncture resistant and can be pressure washed
- Water resistant, nonpermeable surfaces keep moisture out
- Solid surface wind barrier absolutely stops air infiltration, adding to the energy efficiency of any building
- Class1; Class A fire rating and low smoke spread

(A) FSK Facing R-3035

Lamtec R-3035 FSK (Foil-Scrim-Kraft) product is most commonly used as a facing for duct wrap insulation, but has many other insulation applications where a general use vapor retarder is needed. It is also a good choice for radiant barrier applications because of its extremely low emissivity. Permeance Test Method ASTM E 96, Procedure A - 0.02 perms.

(B) PSK Facing WMP-VR

Lamtec WMP-VR is a PSK (White polypropylene film, fiberglass & polyester scrim, 11# natural kraft) vapor retarder, or facing, primarily used for metal or pre-engineered buildings. It is a very cost effective metal building facing that has excellent installed appearance. The white film side is installed toward the interior of the building. Permeance Test Method ASTM E 96, Procedure A - 0.09 perms.

(A–B) Sur-Pro Sur-Stilts and Sur-Pro Quadlock Single-Sided

Top-of-the-line adjustable height stilts. Spring tension (individually adjustable for natural leg movement) gives exactly the right "feel." Telescoping legs slide smoothly for quick and easy adjustment without tools. Strap and shoe adapters included. Available in aluminum or magnesium—magnesium components offer enhanced durability and save 2 lbs. in weight per pair of stilts. The new Quadlock design incorporates an improved heel strap system, side pole key locks, double wingbolts, and an interlock system all adding to the safety and overall comfort of the stilts (not available in the 15"-23" sizes).
