# STINGER<sup>®</sup> UV TEST

ASTM D7869-17  
Xenon Arc Exposure

Testing the UV resistance of two very different types of plastic commonly used in residential roofing

Virgin HDPE Caps lasted nearly 10x longer than regrind plastic caps!

Duration (in hours)	Visual Defects	Bend Evaluation (Snapping, Breakage, Cracknig, Whitening, Etc.)
24	None	No change
48	None	No change
72	None	No change
96	None	No change
120	None	No change
144	None	No change
168	None	No change
192	None	No change
216	None	No change
240	None	No change
264	None	No change
288	None	No change
312	None	No change
336	None	No change
408	None	No change
504	None	No change
553	None	No change
672	None	Cracking, Whitening

NOTE: 500 hours are equal to approximately 1 year exposure

Another way we prove our tools & collated caps are truly **BETTER. FASTER. SAFER.**
