BPI is proud to offer a wide selection of interior doors from Koch Doors, Jeld-Wen, Steves, Unidoor, Woodfold, and Woodgrain. While all styles shown in this catalog are available at BPI, some vendors are only available at certain branches.

Millwork hardware from Delaney, Global Pointe, Johnson Hardware, Penrod, and Schlage are also available through BPI.

KNOTTY ALDER

Quickly growing in popularity, Knotty Alder is known for its rustic appearance.

Knotty Alder grows in the Pacific Northwest and is a medium density hardwood. It is a smooth hardwood with color ranging from a light honey color to a reddish-brown hue. Knotty Alder has a subtle grain pattern that is straighter than other hardwoods and features knots which vary in size and include tight, sound knots as well as rustic, open and split knots.

Key Features

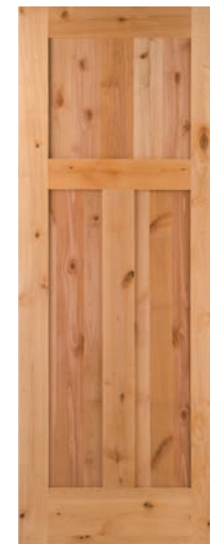

- Evenly textured, with a subdued grain pattern
- Moderate weight and hardness
- Preferred wood for finishing due to its small pore structure and consistency of color
- Can be successfully substituted for other woods when properly colored stains are applied
- Features a warm, honey color when finished naturally

KNOTTY & CLEAR RADIATA PINE

A generally straight grained wood with very wide annual growth rings and knots. Colors of Radiata Pine range from cream to honey-toned. Knotty Pine is abundant in America and features a rich display of reddish-brown knots that reflect the randomness and beauty of nature. Radiata Pine tends to be harder than other pine species with fewer knots. Pine is a versatile lumber that is denser than several other hardwood species and great for many home applications.

Key Features

- Works easily with standard tools
- Good nail holding and gluing ability with a strong resistance to nail splitting
- Accepts a wide variety of paints and stains
- Straight grained with a medium, even texture
- Knotty Pine features a rich display of knots

MAPLE

Admired for its beauty and strength, Maple is often a favorite for millwork, moulding, cabinetry, furniture, and other home applications.

Maple grows in the Eastern United States and has a creamy white color with a slight reddish-brown tinge. It also has a fine texture with grain pattern that is generally straight with some wavy grain. Maple is also resistant to abrasion.

Key Features

- A heavy wood with good strength properties
- High resistance to abrasion and wear due to its superior durability
- Polishes well and is suitable for enamel finishes and brown tones
- Can be easily sanded, stained and polished to a very fine and smooth finish

OAK

Oak grows mainly in the North Central United States. This species of wood is exceedingly strong, heavy, and durable, making it one of the most popular choices used in homes today. Oak has an attractive light color with prominent grain patterns which are relatively straight and features a coarse texture. The durability of this wood makes it an excellent choice for most millwork applications.

Key Features

- Wood dries slowly but stains to a quality finish
- Superior wear-resistance
- Heavy weight and excellent hardness with medium bending strength and stiffness
- One of the most abundant species
- Can be stained to a golden finish with a wide range of finish tones

POPLAR

One of the most common utility hardwoods, Poplar is straight grained, uniform in texture, and is a medium density hardwood. The colors of Poplar range from pale yellow or white to light cream or yellowish brown with occasional streaks of gray or green. Poplar typically grows in the Eastern United States.

Key Features

- Versatile wood that is easy to machine, plane, turn, glue, and bore
- Dries easily with minimal movement in performance and has little tendency to split when nailed
- Takes and holds paint, enamel, and stain exceptionally well
- Medium-density with low-bending, shock resistance, stiffness, and compression values

PRIMED MDF

Primed MDF doors allow for a better quality paint finish and color matching process. Interior applications are produced with MDF veneer and panels for superior paintability. Primed MDF doors come with a smooth surface that is ready for a final paint finish to match your home or project.

Key Features

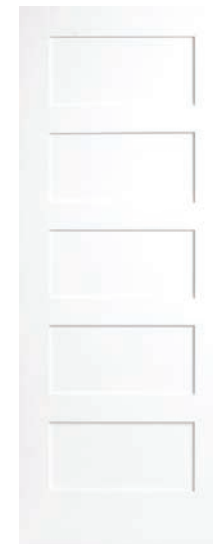

- Pre-primed which allows for superior paint adhesion
- Easier color matching
- Handcrafted to last for years to come
- Available in a wide variety of styles

BARN DOOR COLLECTION

Rustic & Modern

The Barn Door Collection is the perfect fit for modern, contemporary, and rustic applications. Built with superior quality craftsmanship, each barn door features either a panel design or a flat panel shaker design. Customize your barn door with decorative glass in select models to make a statement.

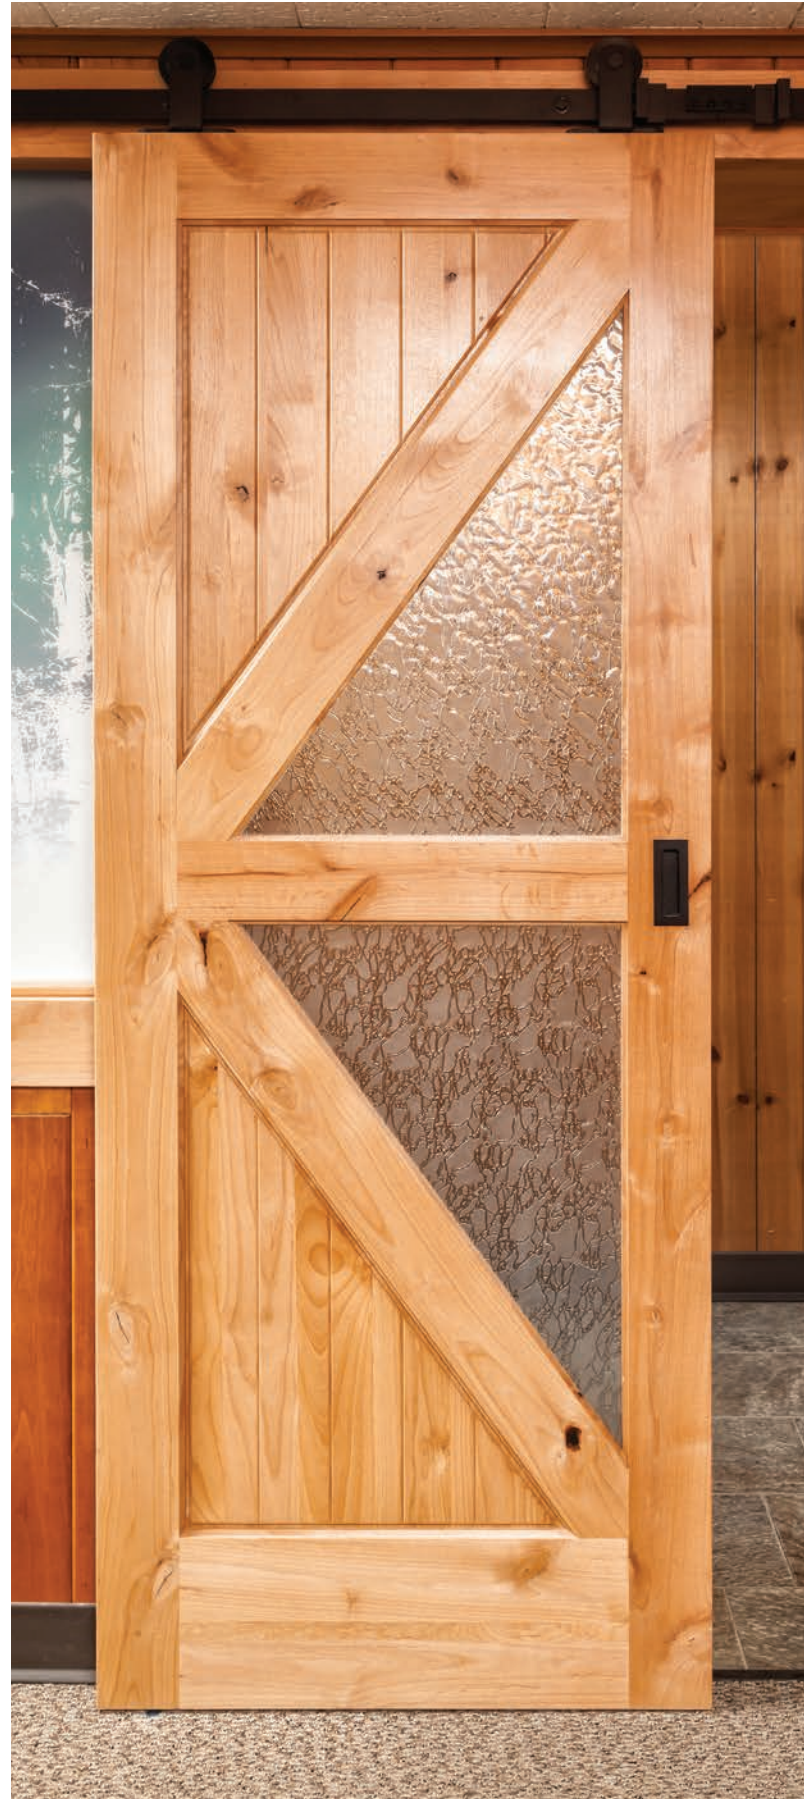

BARN DOOR COLLECTION

Barn doors allow you the flexibility to enhance an entire room with a unique accent piece while adding functionality.

Customize your barn door with the perfect shade of paint or stain to create a statement piece in your home.

Each barn door is built with authentic stile and rail construction. Barn doors can be accentuated with 3/16" deep V-grooves to give the appearance of individual planks.

Unique & Elegant

Get the door you really want with unlimited design options. Choose from modern designs with straight lines or browse elegant curved styles that router carved doors have to offer. Make it uniquely yours.

ROUTER CARVED COLLECTION

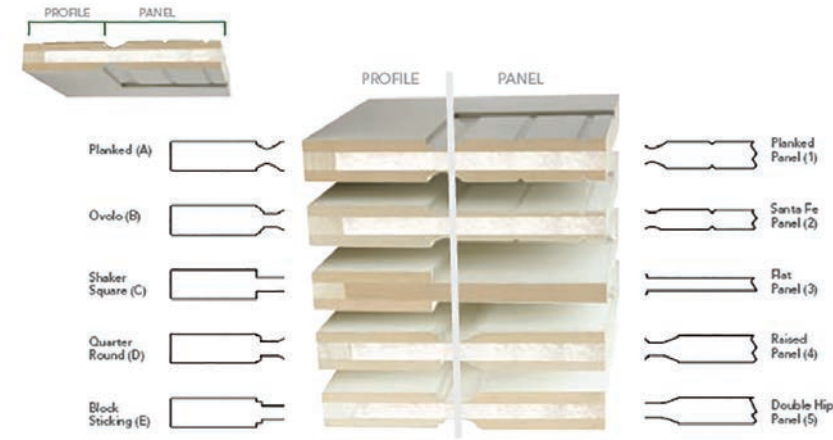

ROUTER CARVED COLLECTION

The Router Carved Collection is made from medium density fiberboard (MDF) and includes both 1-3/8" and 1-3/4" doors available in panel, bifold, and fire-rated doors. Router Carved doors offer infinite design options by combining cutting edge technology and old-fashioned craftsmanship. Woodgrain uses its well-honed techniques from decades of wood door manufacturing to build a better door.

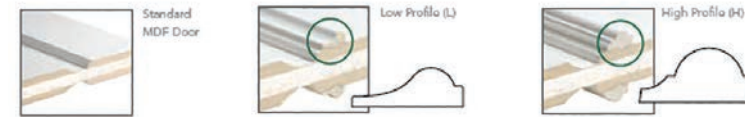

DOOR SPECIFICATIONS:
 Heights: 6'8", 7'0", 8'0"
 Widths: 1'0" - 4'0"
 Thickness: 1-3/8", 1-3/4"

PROFILE AND PANEL OPTIONS

Mix and match any of our five profile options or two raised moulding options.

RAISED MOULDING

THE SUREEDGE ADVANTAGE:

SureEdge solid wood edge band is a feature in each MDF door. Installed in each stile the SureEdge system allows maximum screw holding power and ease of hinge mortising.

ROUTER CARVED DOORS OFFER:

- Exceptionally smooth surface for excellent paint adhesion
- Unlimited design options, including most graphics & text
- Resists shrinkage, expansion, or warping
- Environmentally friendly
- SureEdge design for superior screw holding capacity

ROUTER CARVED DOORS WITH EXPANDED POLYSTYRENE (EPS) CORE OFFER SEVERAL ADVANTAGES:

- 40% lighter than the standard 2'6" x 6'8" MDF door
- Easier to handle and hang
- Exerts less stress on the hinges
- Improve sound transmission properties
